21 October

Lotte is a payroll consultant at SD Worx.
Her client Atlas calls:

“Can we still submit a payroll change?”

Three answers. None of them is right

20th
Procedure Belgium
General rule

23rd
Atlas meeting
A proposal on the board

25th
Teams chat
A question, no owner

22nd
Roy's agreement
Only in Roy's head

Lotte doesn't lack information. Nothing tells her which version to trust. Today she searches for 20 minutes and pings three colleagues. If she guesses wrong, real people get the wrong salary.

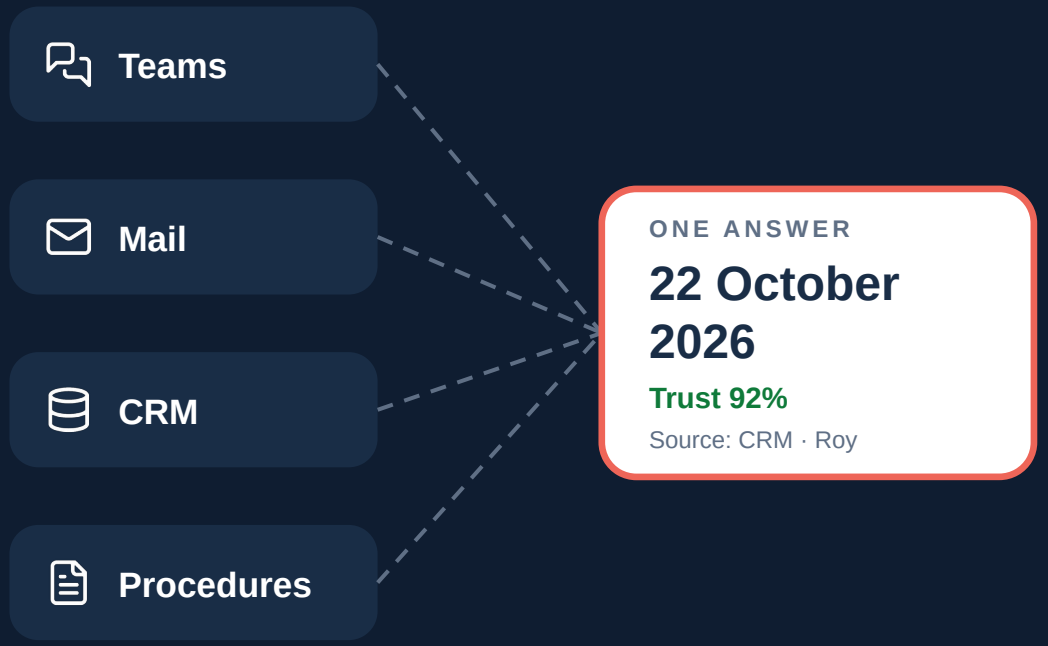

THE SOLUTION

SDtrust

Knowledge you can trust, without anyone writing it down

SDtrust reads what your company already writes, decides which version to trust, and shows you why.

“Atlas may submit payroll changes until 24 November 2026.”

Confirmed by the owner

Belgium · Atlas · November 2026

Trust ~~15%~~ **94%**

LIVE TRANSCRIPT

Finn
Hi Roy, it's Finn. You own the Atlas agreements, so you're the one who knows. Until when can Atlas submit payroll changes in November? I can't find anything approved.

Roy
Hi Finn! Until the 24th, same deal as October. I just forgot to put it in the CRM.

Finn
Thanks Roy! I've saved it, and I'll let Lotte know.

An answer you can trust.

Or an honest “I don't know”,
plus the right colleague.

Zero unnecessary effort.

SDtrust

How Finn decides what to trust

Every percentage on screen comes with its reasons

Authority

Approved by the owner beats a chat message or a meeting proposal

Scope

Valid for this country, this client and this period

Validity

Superseded or expired versions lose, even if they look official

Agreement

Conflicting sources lower trust. Too low? Finn asks the owner
